**RENASIS' DAISY-CHAIN ACCESS POINT WINS  
INNOVATIVE TECHNOLOGY AWARD AT 2006 EDISON SHOWCASE**

*DDC36g Integrated High Powered Access Point Recognized for  
Pioneering Technology and Commercial Potential*

**PROVO, UT – May 25, 2006** – Renasis, LLC, a leading technology innovator specializing in the design, development and manufacture of wireless communications products today announced that its DDC36g Integrated High Powered Access Point has been selected by the Edison Showcase as the first place winner of its Technology Innovation Award.

Launched in April, 2006, the DDC36g Integrated High Powered Access Point is the only high powered access point on the market today with daisy-chain capability, eliminating extraneous cable runs and maximizing the range of wireless networks. The DDC36g takes wireless network deployment to the next level, enabling system administrators to implement cost effective networks that are fast and secure, with low installation and maintenance costs. The DDC36g is the premier wireless networking solution for enterprise, hospitality, campus and municipality environments.

The award was presented at the 7<sup>th</sup> Annual Edison Showcase, May 17, 2006 in Salt Lake City, Utah. Sponsored by the Utah Engineering Experiment Station and the Governor's Office of Economic Development, the Edison Showcase focuses on helping successfully commercialize technologies and spotlighting the newest innovative products emerging from Utah and the Midwest. Products were evaluated anonymously by a group of 40 judges including angel investors, venture capitalists, entrepreneurs, educators and technology experts, in several categories based on ground-breaking technology and commercial potential.

"We are pleased and honored by the validation of the DDC36g by this prestigious group of technology visionaries," said Renasis president Ki Chun. "It's gratifying to see Renasis products, particularly the DDC36g, gaining recognition for its technological innovation and demonstrable value to businesses worldwide."
